

sound investment

architecture that instills trust, assurance,
and integrity

DOYLE|COFFIN
ARCHITECTURE

At Doyle | Coffin, architectural designs for financial institutions embody a sense of security, confidence, and permanence imbued with functionality. Our structures reflect the professionalism of entrusted financial stewards who share their success with clients and the communities they serve.

tailored to fit The strength of Doyle|Coffin Architecture lies in our ability to respond to the client's needs whether for a bank branch in an urban environment or a brokerage firm's international headquarters. Form follows function with unique (not cookie cutter) design concepts.

flexible and sustainable spaces Thorough planning goes into exterior designs that complement a neighborhood. Interior spaces merge work with public areas, offer minimal structural and mechanical intrusion and promote flow, visibility and multi-use.

Efficient designs house technologically advanced office suites where a mobile staff can share functional spaces in a productive and inspiring environment. Whether for a meeting with a high-net-worth client, offering solutions for parents of college-bound children or partnering with a retiree who seeks sound investment options, our commercial designs instill a sense of confidence and trust.

Sustainable and renewable materials marked by clean lines, natural lighting, superior air quality management and tone-on-tone colors create an atmosphere of security, stability and integrity.

working with financial firm management We work directly with financial institution principals and project committees to meet objectives and guide all stakeholders through the design development process to completion. Doyle|Coffin professionals collaborate with community officials to satisfy the requirements of all parties involved, while developing design solutions to meet multiple goals.

adaptable designs that work Financial institutions require the highest possible value benefit, especially in an often volatile and shifting marketplace. We help our clients rethink the use of space and offer alternative design solutions with built-in flexibility and fluidity. Doyle|Coffin provides clearly defined construction budgets and oversight, which are key elements in the execution process.

trusted

Fairfield County Bank

Westport Branch

New Construction

Intricate brick detail surrounding arched windows enhances this traditional yet modern LEED designated bank building.

responsive

Fairfield County Bank

Westport Branch

New Construction

Elegant wood accents and bright open spaces create a dignified and professional service area that puts customers at ease.

complementary

Stamford Branch**
Urban Integration

The architecture of a new bank storefront along a busy street works in harmony with the existing design of upper story rental units.

efficient

**Fairfield County Bank
Stamford Branch**

Urban Integration

Flow, function and form define this inviting multi-use lobby and customer service area highlighted by a blend of harmonious materials, textures and tones.

A photograph of a new construction building for Fairfield County Bank. The building is a single-story structure with white horizontal clapboard siding and a white gabled roof. The gable end features a circular window with a decorative frame and the words "Fairfield County Bank" in a dark, serif font. The main entrance consists of a set of double glass doors with white frames, flanked by two windows with dark shutters. A small sign on the left side of the building reads "Fairfield County Bank". The building is surrounded by a green lawn and some shrubbery. The sky is clear and blue.

connected

**Fairfield County Bank
Darien Branch**

New Construction

Appropriate scale and clapboard siding are key elements that integrate this branch bank into the town's historic district.

refined

**Fairfield County Bank
Darien Branch**
New Construction

A sophisticated suburban town deserves an equally sophisticated bank whose design communicates elegance with paneled walls, a tray ceiling and soaring natural light.

solid

Union Savings Bank

New Construction

A 30,000 square foot flagship bank building boasts a traditional exterior, state-of-the-art boardroom, spacious training facilities and a modern retail service area.

fluid

Union Savings Bank

New Construction

The layout of this customer service area promotes customer focus, traffic flow and a variety of uses in this spacious lobby.

reputable

Fairfield County Bank

Ridgefield Branch

New Construction

The traditional architecture of this new bank and office facility reflects the rich heritage of New England and makes it a welcome addition to the neighborhood.

extra ordinary

Fairfield County Bank

Ridgefield Branch

New Construction

Elegant woodwork, moldings, fixtures and furnishings create an atmosphere that exceeds customer expectations.
